

Clark Forklift Parts

Clark Forklift Parts - At this time, there are no less than 350,000 Clark forklifts performing globally, and in excess of 250,000 operating in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive companies in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 individual parts intended for 20 distinctive designs of forklifts and automated equipment. Your local Clark Supplier is your complete source for availability of all your components needs supplied by Clark Totalift.

Clark has a phenomenal Parts Distribution team. The items warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their buyers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing companies. Driven to supply the highest level of value and service to our users, Clark remains on the leading edge when it comes to enhancing efficiency and benefiting performance.

Internationally, Clark has one of the most outstanding supplier support networks. With over 550 locations globally, dealer representation in over 80 nations and 230 locations in North America, their high level of commitment to their consumers predominates the material handling market.

By pioneering the operator restraint system protection feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark has a continual objective to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its production plants. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental restrictions, thus placing them in a dominant market position.

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly facilities because this method is particularly economical and enables minimal use of resources. Developed to guarantee maximum proficiency, this system is designed to discover and acknowledge the most efficient ways for production facility stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and production efficiencies.

Clark's product engineers and suppliers join together to upgrade the efficiency and brilliance of their merchandise while minimizing expenses. The contemporary value engineering program combines modern product development and offers improved customer support and service within the industry.
