

Meritor Part

Meritor Parts - The Meritor Company is a leading global dealer founded upon 100 years of custom of service and quality. Meritor focuses on integrated systems with a range of modules and components to the original machinery makers and aftermarket equipment within the industrial and transportation trades.

Meritor prides itself in the company's unique energy and thinks that this particular energy contributes to their competitive advantage in the international operations. The company values all their customers and would like to guarantee their success while anticipating their diverse needs. Meritor starts with a philosophy that values diversity of people and their broad thought processes. Operating in 19 nations and hiring over 11,200 individuals, Meritor encourages collaboration and innovation amongst a team of experienced professionals.

By just hiring future focused workers, Meritor strongly feels these top-caliber workers will be able to quickly get used to to changing environments and demonstrate the commitment and performance required to attain results in the competitive materials handling business. The company empowers their teams to make sound business decisions in order to improve the overall success of the company. In return, Meritor provides their workers different opportunities for personal and professional development.

The Advanced Engineering team is on the forefront of components and system engineering. This comprises drivelines, axles, braking and suspension systems used for medium and heavy duty trucks, off-highway vehicles, buses, military vehicles and trailers. The Meritor Advanced Engineering team is developing. They opened a new technical center in Bangalore, India in September 2009 so as to lead their advanced product development initiatives that represent the entire Asia Pacific region. This team is likewise responsible for supporting the requirements of all their worldwide engineering workers.

The Quality team at Meritor is a customer-focused and dynamic group who is dedicated to ensuring optimum growth at their aftermarket distribution facilities and production plant which are situated on 5 continents and in 19 countries.

They have their supplier network which is particularly situated to be able to support the development of the business. Each regional team has globally supported initiatives, quality systems and centralized in Materials Engineering and Six Sigma. Meritor's growing Six Sigma program promotes a data-driven, fact-based method to decision making within each aspect of the company. The DFSS or also referred to as Design for Six Sigma ensures product reliability within each region. The team is also comprised of transactional Green Belts who make use of Six Sigma tools to business techniques and apply lean techniques.
