

JLG Forklift Part

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora started out on a cross country trip in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane company into an market leader, John had no idea that fatefull trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end consequence of a road expedition.

All through their trip, John reacquainted himself with past business connections along the way. In combination with these conversations and a noteworthy event; two workers were unfortunately electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a substantial market for a product that could quickly and securely lift people in the air to accomplish maintenance and other construction functions.

After returning from their trip, John set up a business with two of his friends and purchased a metal fabricating business in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the simple design elements of that original lift into existing versions.

Since then, JLG Forklifts have come a great distance from when Mr. John L. Grove returned from his fatefull cross-country trip and since the first JLG aerial platform entered the marketplace. As of today, the company has expanded itself into quite a few international markets and continues to cultivate contemporary machines to guarantee that customers are able to become safer and more resourceful within their workplace.
