

## Pulp Clamps

Pulp Clamps - There is a wide range of forklift attachments accessible in order to make the equipment more efficient. A snowplow attachment could be mounted to the front part of the forklift. A scoop bucket could be helpful when the task requires moving soil, sand, snow, or gravel. A double block handler allows the individual operating the forklift to pick up 2 loads and stack them beside each other. Lots of those accessories are considered excellent for light to medium tasks.

Another forklift attachment is the package lift clamp, which can carry and transfer heavier pallets. Also, pallet crane forks may be utilized to lift and move pallets with an overhead crane. A drum clamp accessory is helpful for moving very heavy drums from place to place without having to utilize a pallet. Lift truck mounted hoppers enable material to be transferred and dumped without having to do it manually. These hoppers are self dumping when the bumper is released.

There are also accessories accessible that could transform the lift truck into a commercial broom or mop. Such accessories are ideal for cleaning boat docks, storehouse floors and parking areas. Lift truck mounted platforms are obtainable outfitted with dual entry doors and can be hooked up to be able to move workers from one site to another. The mounted platform attachment is ideal for reaching parts which can be hard to access, particularly if you have products or materials stored in out of the way areas or really up high.

Attachments can be a very helpful piece of equipment when put in a lift truck, transforming an typical forklift into a mobile hoist unit. It is most useful when moving unbalanced or awkward loads. This attachment could either be mounted on the carriage itself, telescopic, or be connected or even forklift mounted.
